  - ▶ SmartScan a receipt
  - ▶ Manually (no receipt)
  - ▶ For web / email receipts, forward the receipt from your Diamond email to **receipts@expensify.com**
    - ▶ (The receipt has to be from the same email address as your Expensify account so that it can link the receipt to your account!)

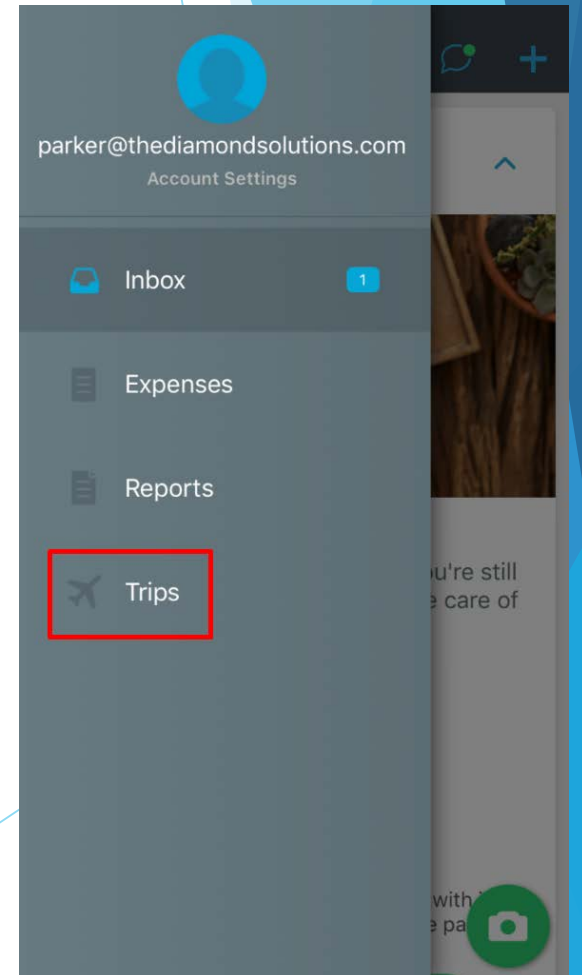

# The Reports Tab:

- ▶ On the Reports tab, you can view all of your reports
- ▶ Submitting a report is like giving an envelope of receipts to Finance to look over, approve, and put into Quickbooks
- ▶ Reports are shown in one of the following states:
  - ▶ **Open** – you have created an expense report that hasn't been submitted
  - ▶ **Processing** – your report is being reviewed by your admin

- ▶ Diamond has 3 policies (or groups) set up in Expensify:
  - ▶ **Field Workers**
  - ▶ **Office / Shop**
  - ▶ **Project Management**
- ▶ Each policy has different settings and different options. So, Expensify may look different on your phone vs. someone else's.

# How to record an expense (cont.)

- ▶ While SmartScan is working, select "Category" and choose the appropriate account (see your account cheat sheet). For example, scroll down and choose "Meals".
- ▶ You are **required** to enter a Category for each expense

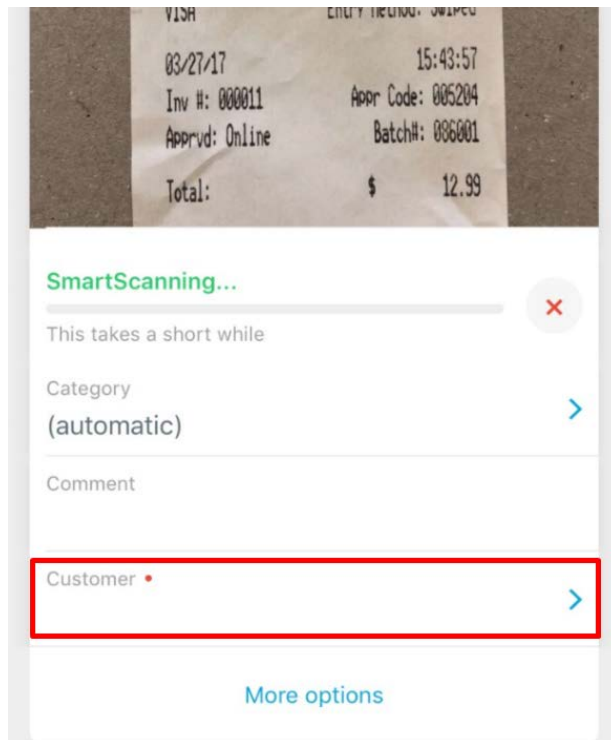

**NOTE:** There is currently a bug in the app here.

Headers appear gray – you cannot choose these. The categories that you can choose appear black.

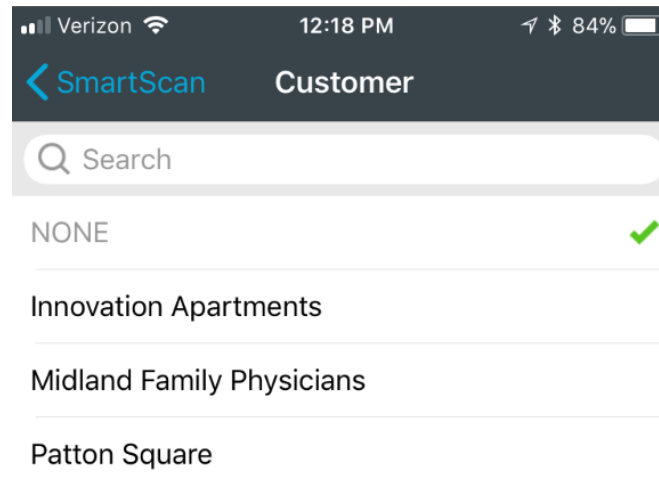

Sometimes, items that should be black appear gray. However, you can still click on them.

# How to record an expense (cont.)

- ▶ When SmartScan is finished, go to the “Expenses” tab.
- ▶ Here you can see the Expense you created. Note the Merchant, Date, and Total have been added by SmartScan.
- ▶ Congratulations, you have added your first expense!

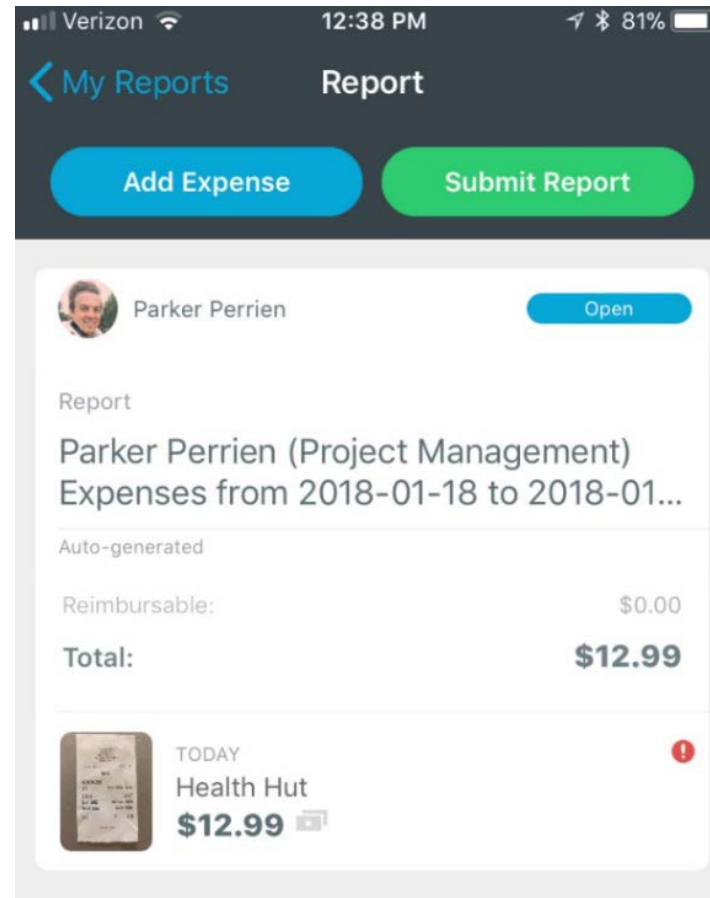

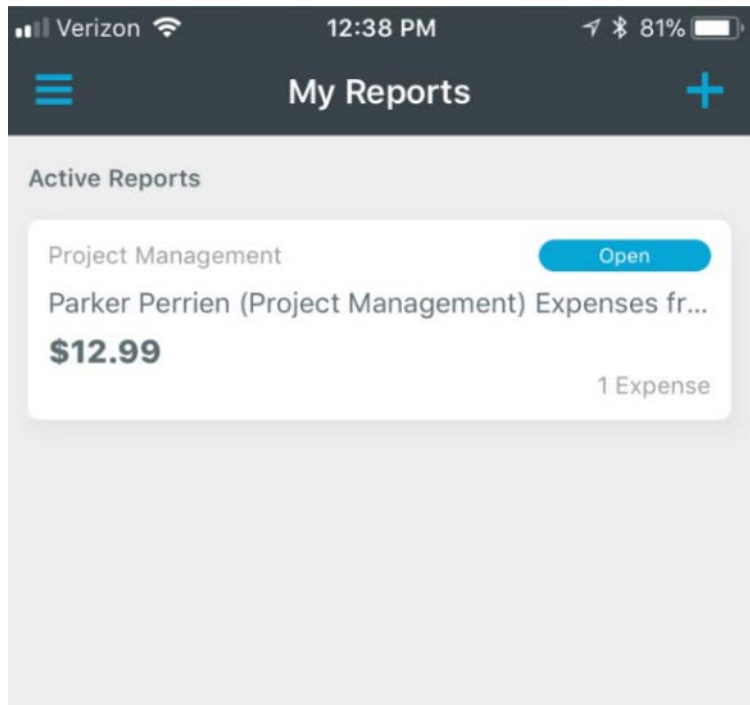

# Violations

- ▶ At times, you may see that your expense has a violation. You will see a “!” symbol.
- ▶ You may receive a violation because:
  - ▶ The receipt is too old
  - ▶ There is no receipt photo
  - ▶ The card used on the receipt doesn’t match your company card number
  - ▶ The amount is over \$1000 (you’ll need to get approval from Finance)
  - ▶ Etc.
- ▶ Expenses with violations will not go on your report and will not be turned in. **It is your responsibility to look through these violations** and fix them.
- ▶ If you cannot figure out how to fix your violation, talk to the admin.

# Your Reports

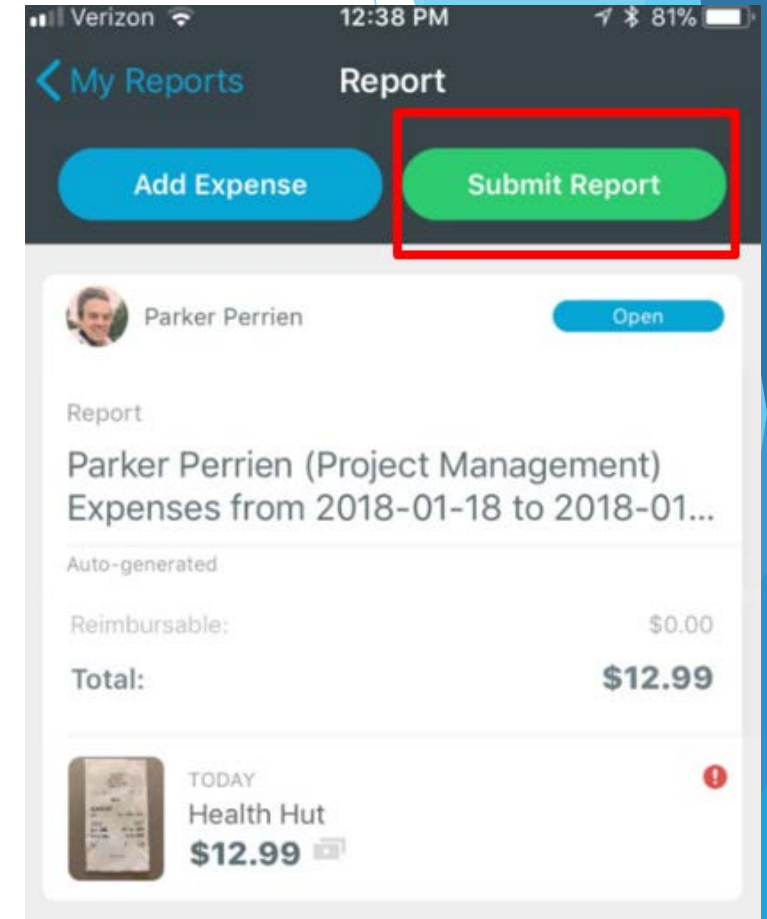

- ▶ Go to the Reports tab
- ▶ Here you will see that your expense has been added to your current report

# Submitting Your Reports

- ▶ When you have all necessary Expenses on a report, you can click “Submit Report” to send it off for approval.
  - ▶ A report cannot be edited or changed once it has been submitted!
  - ▶ If an Expense was missed, it will just go on the next Report
- 
- ▶ We will also set up reports to **auto-submit** each night on a daily or weekly basis, so the best thing to do is keep up with your Expenses so that they are included in the auto-submitted report

# How do I know which Category to choose?

- ▶ Refer to Category cheat sheet
- ▶ Let's do a few examples:

You paid for some crack-sealing rubber on your credit card. Which category?

Crack Sealing - **Materials**

You paid a toll while driving to a job. Which category?

Job Related Travel - **Transportation**

You bought a case of water AND some road salt at Home Depot. Which category?

SPLIT between “**Water**” and “Salting - **Materials**”

(The “Split” feature isn't working on our apps right now. I will look in to fixing this and let you know when it's ready to use!)

**Note:** When buying something over \$1000, you will get a violation. Please discuss these large purchases with someone in Finance to get approval.
